

Knowledge is the best medicine.

## What is HealthLoop?

HealthLoop is a digital communication tool that allows your surgeon to give you helpful instructions throughout the course of your care. Through HealthLoop, your surgeon will send you emails with important reminders that will guide you along the way.

## How will HealthLoop help me?

Your surgeon provides HealthLoop to help you have a positive surgical experience.

HealthLoop will alert you when you have received new information. Reviewing the information is easy with online “check-ins.” It is important to read the pre and postoperative tips and reminders as you receive them from your surgeon to help guide you.

## What will I need to participate?

An email address and Internet access are all you need. That’s it. You can use a computer, tablet or smartphone. If you have an iPhone, you can download the HealthLoop app.

Can I opt out of Healthloop?

Yes, you can opt out.

HealthLoop is provided as a way for your surgeon to keep you in the loop throughout your course of care. If you wish to opt out, go to your preferences menu and choose to discontinue follow up. If you choose not to participate, simply do not activate your account.

As always, feel free to call your surgeon's office if you have any questions.

How do I get started?

Getting started is easy. Simply provide your surgeon with your email address. Once your procedure is scheduled, your surgeon will send you an email to activate your personalized care plan. Confirm your birthdate and create a password, then your account will be ready to go. Your surgeon will begin sending you messages.
